

SOME TERMS FOR TEST 1

5 paths to truth

ABCDE SHOWS

ablation

acetylcholine

algorithms

axon

axon hillock

backward chaining

behaviors

Berkeley, George

bottom-up processing

cerebellum

cocaine

cochlea

concepts

cones

consolidation

corpus collosum

data reduction systems

Democritus

dendrite

dendritic spines

depolarization

Descartes

dopamine

dorsolateral

dualism

empiricism

experimental physiology

facts

figure & ground

flavor

forward chaining

frontal lobe

GABA

Galvani

glutamate

habituation

heuristics

hippocampus

Hobbes

homunculus

icon channel

incus

interval

levels of measurement

Locke

magnitude

malleus

materialism

medial
mentalism
mind-body problem
monism (spiritual and physical)
monosodium glutamate
motor cortex
Muller
myelin sheath
negative reinforcement
nerves
neurons
neurotransmitter
nominal
occipital lobe
orbitofrontal
ordinal
oval window
overlearning
paradoxical cold
parietal lobe
Parkinson's disease
phi phenomenon
philosophy
phrenology
pinna
positive reinforcement
post-synaptic inhibition
pragnanz
premotor cortex
principles of perceptual efficiency
ratio
rationalism
rods
round window
schemas
scientific method
scripts
serotonin
shaping
soma
stapes
Stroop effect
structuralism
systematic observation
target detection
target identification
taste
temporal lobe
top-down processing
volley theory
Wundt
